Re:Life Health Website Revamp - Developer Specification

Executive Summary

This document provides a comprehensive specification for the complete revamp of the relife.health website. The revamp introduces a modern, user-centric design with seven key pages, each serving a distinct purpose in the customer journey. The design philosophy emphasizes warmth, accessibility, and organic visual flow while maintaining professional credibility.

Project Overview

Objectives

The relife.health website revamp aims to:

1. **Establish clear value proposition** through an improved home page that guides users to relevant sections
2. **Showcase wellness products** (sleeping boxes, poppy pads, etc.) with e-commerce integration capability
3. **Promote community programs** including CSR events, seminars, and mental health initiatives
4. **Highlight technology solutions** through dedicated application promotion pages
5. **Maintain trust and credibility** with refined About Us, Wellness Center, and Contact Us sections
6. **Streamline user onboarding** with a clear “Register Now” call-to-action linking to the webapp

Target Audience

- Individuals seeking mental health support (18-65 years old)
- Corporate clients interested in CSR programs
- Wellness enthusiasts looking for premium products
- Healthcare professionals seeking collaboration opportunities

---

Design Philosophy: Warm Minimalism with Organic Curves

Core Design Principles

The website follows a **Warm Minimalism** design approach that combines:

1. **Clarity First**: Generous whitespace and purposeful typography guide users intuitively through the site
2. **Organic Flow**: Curved dividers, rounded elements, and asymmetric layouts create visual warmth
3. **Emotional Safety**: Soft colors and gentle transitions evoke trust and care
4. **Progressive Disclosure**: Information reveals naturally as users scroll, avoiding cognitive overload

Color Palette

Element	Color	Hex Code	Usage
Primary	Sage Green	#A8B8A0	Buttons, links, primary CTAs, accents
Secondary	Terracotta	#D4A89A	Secondary accents, highlights
Accent	Lavender	#C4B5D4	Tertiary accents, subtle highlights
Background	Off-white	#F9F7F4	Page backgrounds, neutral areas
Text	Charcoal	#2C2C2C	Primary text content
Borders	Light Gray	#E8E6E1	Card borders, dividers
Muted	Light Gray	#6B6B6B	Secondary text, muted content

Typography System

Element	Font	Weight	Size	Line Height
H1 (Page Titles)	Poppins	700	48px	1.2
H2 (Section Titles)	Poppins	700	36px	1.2
H3 (Subsections)	Poppins	700	24px	1.3
Body Text	Inter	400	16px	1.6
Small Text	Inter	400	14px	1.5
Button Text	Inter	500	16px	1.2

Font Import: Google Fonts (Poppins 600,700 and Inter 400,500,600)

Spacing & Layout

- **Container**: Max-width 1280px with responsive padding (16px mobile, 24px tablet, 32px desktop)
- **Grid System**: 12-column grid for desktop, 1-column for mobile, 2-column for tablet
- **Spacing Scale**: 8px, 16px, 24px, 32px, 48px (multiples of 8px)

- **Border Radius**: 12px for most elements, 24px for larger cards
- **Shadows**: Subtle shadows for depth (0 1px 2px for small, 0 4px 6px for medium, 0 10px 15px for large)

Interactive Elements

- **Hover Effects**: Smooth 200-300ms transitions with color and transform changes
- **Button States**:
  - Default: Primary color background
  - Hover: Darker shade with slight lift (transform: translateY(-2px))
  - Active: Pressed state with inset shadow
  - Disabled: Reduced opacity (50%)
- **Links**: Underline on hover, color transition to primary
- **Cards**: Border color change to primary on hover, shadow enhancement

---

Page Specifications

1. Home Page (`/`)

Purpose: Introduce Re:Life's value proposition and guide users to key sections

Key Sections:

1. **Navigation Bar** (Sticky)
   - Logo with text "Re:Life"
   - Navigation links: Home, Products, Services, Application, Wellness Center, About Us, Contact Us
   - "Register Now" CTA button
   - Mobile hamburger menu for screens < 768px
2. **Hero Section**
   - Headline: "Your Mental Health & Wellness Journey Starts Here"

    - Subheadline: Brief description of the platform
    - Two CTAs: “Explore Products” and “Join Our Programs”
    - Background: Gradient from primary/10 to accent/10 with icon

3. **Features Overview** (4-column grid)
    - Premium Products
    - Community Programs
    - Wellness Center
    - Mobile App
    - Each card includes icon, title, description, and link

4. **Call-to-Action Section**
    - Headline: “Ready to Transform Your Wellness?”
    - Subheadline: Encouraging message
    - CTA: “Get Started Now”

5. **Footer**
    - Logo and tagline
    - Quick links organized by category
    - Copyright information

Design Notes:

- Use organic SVG dividers between sections
- Implement parallax scrolling on hero background (subtle)
- Fade-in animations as elements enter viewport

---

2. Products Page (`/products`)

Purpose: Showcase wellness products and enable e-commerce integration

Key Sections:

1. **Hero Section**

    - Page title and description
    - Emphasis on product quality and benefits

2. **Product Grid** (3-column desktop, 1-column mobile)
    - Product cards with:
        - Product image placeholder (gradient background with icon)
        - Product name and category
        - Brief description
        - Star rating and review count
        - Feature list (3 key features)
        - Price and “Add to Cart” button
    - Hover effect: Border color change, shadow enhancement
3. **Product Details** (Per Card)
    - Name: Product title
    - Category: Product type
    - Price: Displayed prominently
    - Rating: 5-star system with review count
    - Features: Bulleted list of key benefits
    - CTA: “Add to Cart” button
4. **Call-to-Action Section**
    - Headline: “Ready to Invest in Your Wellness?”
    - Description: Mention satisfaction guarantee and free shipping
    - CTA: “Shop All Products”
5. **Footer**

Products to Display:

- Premium Sleeping Box ($299.99, 4.8 rating)
- Poppy Pad Comfort ($149.99, 4.9 rating)
- Wellness Bundle ($399.99, 4.7 rating)

- Meditation Cushion ($79.99, 4.6 rating)
- Sleep Wellness Tea Set ($49.99, 4.8 rating)
- Aromatherapy Diffuser ($89.99, 4.7 rating)

Integration Notes:

- "Add to Cart" buttons should integrate with payment gateway (Stripe/POS system)
- Product images should be uploaded via CDN
- Price and inventory should be managed via backend API

---

3. Services Page (`/services`)

Purpose: Promote CSR events, seminars, and mental health programs

Key Sections:

1. **Hero Section**
    - Page title and description
    - Emphasis on community and support
2. **Services Overview** (2-column grid)
    - Mental Health Seminars
    - Support Group Programs
    - Wellness Workshops
    - Corporate CSR Programs
    - Each card includes icon, title, description, schedule, participant count, and duration
3. **Upcoming Events** (3-column grid)
    - Event cards with:
        - Event title
        - Date and time
        - Location (virtual or physical)

        - Available spots
        - “Register Now” button

4. **Why Join Section** (4-column grid)
    - Expert Guidance
    - Community Support
    - Practical Tools
    - Flexible Access
5. **Footer**

Upcoming Events (Sample Data):

- Stress Management Masterclass (April 25, 2026, 6-8 PM, Virtual, 45 spots)
- Mindfulness & Meditation Workshop (May 2, 2026, 10 AM-1 PM, Dambulla, 30 spots)
- Mental Health Awareness Seminar (May 9, 2026, 7-9 PM, Virtual, 60 spots)

Integration Notes:

- “Register Now” buttons should link to registration system
- Event data should be managed via backend API
- Calendar integration for event management

---

4. Application Page (`/application`)

Purpose: Promote web and mobile applications

Key Sections:

1. **Hero Section**
    - Page title and description
    - Emphasis on accessibility and convenience
2. **Web Application Section** (2-column layout)

- Headline: “Web Application”
- Description: Full platform access
- Feature list (6 features):
  - AI-powered mental health chatbot
  - Appointment scheduling
  - Personal wellness tracking
  - Community resources
  - Prescription management
  - Secure video conferencing
- CTA: “Launch Web App”
- Background: Gradient with icon

3. **Mobile Application Section** (2-column layout, reversed)
   - Headline: “Mobile Application”
   - “Coming Soon” badge
   - Description: Mobile app in development
   - Feature list (6 features):
     - Push notifications
     - Offline access
     - Biometric authentication
     - Native performance
     - Seamless sync
     - Emergency resources
   - CTA: “Notify Me When Available”
   - Background: Gradient with icon
4. **Features Comparison Table**
   - Rows: Feature list
   - Columns: Web App, Mobile App
   - Checkmarks for available features

5. **Download Section**
    - Headline: “Get Started Today”
    - Two CTAs: “Launch Web App” and “Download Mobile (Coming Soon)”
6. **Footer**

Integration Notes:

- “Launch Web App” button should link to webapp URL
- “Notify Me” button should capture email for notification list
- Mobile app links should be updated when app is available

---

5. Wellness Center Page (`/wellness-center`)

Purpose: Provide resources, guides, and community support

Key Sections:

1. **Hero Section**
    - Page title and description
    - Emphasis on resources and guidance
2. **Resources Overview** (4-column grid)
    - Wellness Guides (24 guides)
    - Expert Tips (100+ tips)
    - Community Stories (50+ stories)
    - Progress Tracking (Unlimited)
    - Each card includes icon, title, description, and count
3. **Latest Articles & Resources** (2-column grid)
    - Article cards with:
        - Category badge
        - Article title
        - Date published

        - Read time estimate
    - Hover effect: Title color change to primary
4. **Daily Wellness Tips** (3-column grid)
    - Morning Routine
    - During the Day
    - Evening Routine
    - Each section includes 3 tips
5. **Call-to-Action Section**
    - Headline: “Start Your Wellness Journey”
    - CTA: “Explore Wellness Center”
6. **Footer**

Sample Articles:

- Understanding Anxiety: A Comprehensive Guide
- 5 Meditation Techniques for Beginners
- Sleep Hygiene: Tips for Better Rest
- Building Resilience in Daily Life
- Nutrition and Mental Health Connection
- Workplace Stress Management Strategies

Integration Notes:

- Article content should be managed via CMS
- Search functionality for articles (future enhancement)
- User-generated content for community stories

---

6. About Us Page (`/about-us`)

Purpose: Build trust and credibility through company mission and values

Key Sections:

1. **Hero Section**
    - Page title and description
    - Emphasis on mission and vision
2. **Mission Section** (2-column layout)
    - Headline: “Our Mission”
    - Description: Company mission and founding story
    - CTA: “Learn More”
    - Background: Gradient with icon
3. **Core Values** (4-column grid)
    - Compassion
    - Excellence
    - Community
    - Innovation
    - Each value includes icon, title, and description
4. **What We Offer** (2x2 grid)
    - Comprehensive Platform
    - Community & Support
    - Wellness Products
    - Technology Solutions
    - Each section includes bulleted list
5. **Team Section** (3-column grid)
    - Team member cards with:
        - Avatar placeholder
        - Name
        - Role
        - Bio

    - Sample team: Founder, CMO, CTO

6. **Stats Section** (4-column grid)
    - 50K+ Active Users
    - 500+ Mental Health Professionals
    - 1000+ Success Stories
    - 24/7 Support Available

7. **Call-to-Action Section**
    - Headline: “Join Our Mission”
    - CTA: “Get Started Now”

8. **Footer**

Integration Notes:

- Team member information should be editable via CMS
- Stats should be updated from backend API
- Social media links should be added to team profiles

---

7. Contact Us Page (`/contact-us`)

Purpose: Facilitate customer communication and support

Key Sections:

1. **Hero Section**
    - Page title and description
    - Emphasis on accessibility

2. **Contact Information** (4-column grid)
    - Email: hello@relife.health (24-hour response)
    - Phone: +94 (0) 123 456 789 (Mon-Fri, 9 AM-6 PM)
    - Location: Dambulla, Sri Lanka

    - Support Hours: 24/7 Available

3. **Contact Form & Info** (2-column layout)
    - Form fields:
        - Full Name (text input)
        - Email Address (email input)
        - Subject (text input)
        - Message (textarea)
        - Submit button
    - Info box with reasons to contact
    - Quick response time notice
4. **FAQ Section** (2-column grid)
    - 6 frequently asked questions with answers
    - Expandable/collapsible design (optional)
5. **Footer**

Form Validation:

- All fields required
- Email format validation
- Message length: minimum 10 characters
- Success message after submission

Integration Notes:

- Form submissions should be sent to backend API
- Email notifications to support team
- Auto-reply email to user
- Form data should be stored in database

Technical Architecture

Frontend Stack

- **Framework**: React 19 with TypeScript
- **Routing**: Wouter (lightweight client-side router)
- **Styling**: Tailwind CSS 4 with custom design tokens
- **UI Components**: shadcn/ui (pre-built accessible components)
- **Icons**: Lucide React
- **Animations**: Framer Motion (optional for advanced animations)
- **Build Tool**: Vite

Project Structure

```
client/
├── src/
│   ├── pages/
│   │   ├── Home.tsx
│   │   ├── Products.tsx
│   │   ├── Services.tsx
│   │   ├── Application.tsx
│   │   ├── WellnessCenter.tsx
│   │   ├── AboutUs.tsx
│   │   ├── ContactUs.tsx
│   │   └── NotFound.tsx
│   ├── components/
│   │   ├── Navigation.tsx
│   │   ├── ui/
│   │   │   ├── button.tsx
│   │   │   ├── card.tsx
│   │   │   └── ... (other shadcn/ui components)
│   │   └── ErrorBoundary.tsx
│   ├── contexts/
│   │   └── ThemeContext.tsx
│   ├── lib/
│   │   └── utils.ts
│   ├── App.tsx
│   ├── main.tsx
│   └── index.css
├── public/
│   ├── favicon.ico
│   └── robots.txt
└── index.html
```

Key Files

File	Purpose
`client/src/index.css`	Global styles and design tokens
`client/index.html`	HTML entry point with Google Fonts
`client/src/App.tsx`	Main app component with routing
`client/src/components/Navigation.tsx`	Shared navigation component
`client/src/pages/*.tsx`	Individual page components

Implementation Guidelines

Design Token Usage

All styling should use the predefined design tokens in `client/src/index.css`:

```
/* Colors */
--primary: #A8B8A0
--secondary: #D4A89A
--accent: #C4B5D4
--background: #F9F7F4
--foreground: #2C2C2C

/* Spacing */
--radius: 0.75rem
```

Component Development

1. **Use shadcn/ui Components**: Leverage pre-built components for consistency
2. **Extend with Tailwind**: Add custom styling using Tailwind utilities
3. **Maintain Accessibility**: Ensure keyboard navigation and ARIA labels
4. **Responsive Design**: Mobile-first approach with breakpoints at 640px, 1024px

Animations & Interactions

- **Page Transitions**: Fade in/out (300ms)
- **Hover Effects**: Color and transform changes (200ms)
- **Scroll Animations**: Fade-in as elements enter viewport
- **Button States**: Visual feedback for all interaction states

Image & Media Handling

- **Product Images**: Upload to CDN via `manus-upload-file --webdev`
- **Placeholder Images**: Use gradient backgrounds with icons
- **Responsive Images**: Use `srcset` for different screen sizes
- **Optimization**: Compress images before upload

Integration Points

Backend API Integration

The following endpoints should be created for full functionality:

Endpoint	Method	Purpose
`/api/products`	GET	Fetch product list
`/api/products/:id`	GET	Fetch product details
`/api/cart`	POST	Add product to cart
`/api/services`	GET	Fetch services and events
`/api/services/:id/register`	POST	Register for event
`/api/contact`	POST	Submit contact form
`/api/articles`	GET	Fetch wellness articles
`/api/team`	GET	Fetch team information

Payment Gateway Integration

- **Stripe Integration**: For online product purchases
- **POS System Integration**: For in-store transactions
- **Cart Management**: Session-based or user-account based

Email Notifications

- **Contact Form**: Confirmation email to user, notification to support
- **Event Registration**: Confirmation with event details
- **Newsletter**: Subscription management for wellness tips

Performance Optimization

Best Practices

1. **Code Splitting**: Lazy load pages using React.lazy()
2. **Image Optimization**: Use WebP format with fallbacks

3. **Caching**: Implement browser caching for static assets
4. **Minification**: Minify CSS and JavaScript in production
5. **CDN**: Serve static assets from CDN

Metrics to Monitor

- **Lighthouse Score**: Target > 90
- **Core Web Vitals**: LCP < 2.5s, FID < 100ms, CLS < 0.1
- **Page Load Time**: Target < 3 seconds
- **Time to Interactive**: Target < 5 seconds

SEO & Accessibility

SEO Requirements

- **Meta Tags**: Title, description, keywords for each page
- **Open Graph**: Social media preview tags
- **Structured Data**: Schema.org markup for products and services
- **Sitemap**: XML sitemap for search engines
- **Robots.txt**: Proper indexing rules

Accessibility (WCAG 2.1 AA)

- **Color Contrast**: Minimum 4.5:1 for text
- **Keyboard Navigation**: All interactive elements accessible via keyboard
- **Screen Reader**: Proper ARIA labels and semantic HTML
- **Focus Indicators**: Visible focus rings on all interactive elements
- **Alt Text**: Descriptive alt text for all images

Testing Checklist

Functional Testing

- [ ] All navigation links work correctly
- [ ] Forms submit and validate properly
- [ ] Buttons trigger correct actions
- [ ] Images load and display correctly
- [ ] Responsive design works on all breakpoints

Cross-Browser Testing

- [ ] Chrome/Edge (latest)
- [ ] Firefox (latest)
- [ ] Safari (latest)
- [ ] Mobile browsers (iOS Safari, Chrome Mobile)

Performance Testing

- [ ] Page load time < 3 seconds
- [ ] Lighthouse score > 90
- [ ] No console errors or warnings
- [ ] Smooth animations and transitions

Accessibility Testing

- [ ] Keyboard navigation works
- [ ] Screen reader compatible
- [ ] Color contrast meets WCAG standards
- [ ] Focus indicators visible

Deployment Checklist

- [ ] All pages created and tested
- [ ] Design tokens properly applied
- [ ] Images optimized and uploaded to CDN
- [ ] Forms integrated with backend
- [ ] Analytics tracking implemented
- [ ] SEO meta tags added
- [ ] Accessibility audit completed
- [ ] Performance optimized
- [ ] Security review completed
- [ ] Staging environment tested
- [ ] Production deployment

Future Enhancements

1. **E-commerce**: Full shopping cart and checkout flow
2. **User Accounts**: User registration and profile management
3. **Search**: Full-text search for products and articles
4. **Recommendations**: AI-powered product recommendations
5. **Reviews**: User reviews and ratings for products
6. **Blog**: Dedicated blog section for wellness content
7. **Mobile App**: Native iOS and Android applications
8. **Community Forum**: User discussion and support forum
9. **Appointment Booking**: Integration with calendar system
10. **Multi-language**: Support for multiple languages

Support & Maintenance

Regular Maintenance Tasks

- Update content and product information
- Monitor performance metrics
- Review and respond to user feedback
- Update security patches
- Backup database regularly

Support Contacts

- **Technical Issues**: development@relife.health
- **Content Updates**: content@relife.health
- **General Inquiries**: hello@relife.health

Conclusion

This specification provides a comprehensive guide for developing the revamped relife.health website. The design emphasizes warmth, accessibility, and user-centric navigation while maintaining professional credibility. By following these guidelines and maintaining consistent design principles, the website will effectively communicate Re:Life's value proposition and support user engagement across all key sections.

For questions or clarifications, please contact the project team.
